REMARKS: in sun on sand

Laid 3 eggs in bottle between Sept. 7 (12 noon)
and Sept. 10 (10 AM). Eggs contained tiny embryos.
(Probably laid Sept. 9 or 10, since they were
not dessicated yet.)

2 corpora lutea - left ovary; 1 corpus luteum -
right ovary.

Was not seen on road while night collecting earlier, so apparently got on road after dark. It had not been hit much earlier than when we found it because the hind legs and tail were still twitching.

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry should be supported by a valid receipt or invoice. This ensures transparency and allows for easy verification of the data.

In the second section, the author details the various methods used to collect and analyze the data. This includes both manual and automated processes. The goal is to ensure that the information is both reliable and up-to-date.

The third section focuses on the results of the analysis. It shows a clear upward trend in the data over the period covered. This indicates that the current strategy is effective and should be continued.

Finally, the document concludes with a series of recommendations for future actions. These include expanding the data collection to include new markets and improving the reporting process to make it more efficient.
